-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In view of a telephone call from Attorney Stein and after a review of the Office Action which was mailed on or about 05 February 2005 the Office Action has been rescinded in favor of the non-Final Office Action provided hereinbelow. A new Shortened Statutory Period (SSP) is also provided and begins with the mail date of the instant Office Action.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tournier et al. Tournier et al teach a crimping tool for connection of an electric cable in a end of a contact. An end of a cable is partially stripped and is inserted into an opening in the contact. A first jaw pair (at Cf. 56 in Fig. 3)) are used to radially grip the contact while the contact is moved. This allows second jaw pair to crimp the shaft of the contact as the contact shaft is moving. It would have been obvious to have the second jaw pair move while the first jaw pair is in a tightened position rather than vice versa given the evidence in Tournier et al. The apparatus (or method) taught by Tournier et al is substantially the inverse or converse of that claimed by Applicant. The limitations recited claims 4 and 5 are held to be without patentable merit inasmuch as crimping a copper shaft onto aluminum wire strands and crimping wire at 8 points with the tool is held to be old in this art. Moreover these limitations are within the ordinary skill of an artisan. Alternatively these limitations are held to be mere design choice inasmuch as no

specific purpose is given nor is any problem solved thereby. It is also noted that Tournier et al indeed teach a trigger to operate the crimping tool (Cf. Fig. 2).

Claims 11 and 12 are allowable.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. J. Arbes whose telephone number is 571-272-4563.
